

2023 Single/Tandem Axle Course

Obstacle #1 - Traffic Circle

The object of this obstacle is to navigate the truck around the circle and chutes without hitting any barrels, changing direction, or stopping. The operator must do this in a continuous motion. Not wearing a seat belt will get you a no score for that obstacle and every obstacle after that, if not corrected. Completing this obstacle is worth **100** points.

Obstacle #2 - Forward Alley Dock

The object of this obstacle is to navigate the truck into the alley dock without hitting any barrels or rails and getting the left side plow **Blade** between the 1st and 3rd line for highest points. The operator must do this in a continuous motion. Sound your horn when ready to get measured. No score if you go over line 3 and also if you hit the back barricade. Completing this obstacle is worth **300** points.

Obstacle #3 - Reverse Alley Dock/Change Drivers

The object of this obstacle is to navigate the truck in reverse into the alley dock without hitting any barrels or rails and getting the furthest back part of the truck (singles-tailgate, tandem-sander) between the 1st and 3rd line for highest points. The operator must do this in a continuous motion. Sound your horn when ready to get measured, pull forward out of the barrels by the stop sign, and then change drivers. Hitting the back barricade and going over line 3 will result in **0** points. Not wearing a seat belt will get you a no score for that object and everyone after that, if not corrected. Completing this obstacle is worth **300** points.

Obstacle #4 - Bonus Right Corner

The object of this obstacle is to navigate a tight right turn, getting the back tire (back axle-tandem) to the inside marks next to the barrel without touching it. **0** points given if stopping further than 24" away from barrel and **-100** points for hitting the barrels. Completing this obstacle best is worth **300** points.

Obstacle #5 - Cul-De-Sac

The object of this obstacle is to navigate the truck around the cul-de-sac in a clockwise direction without hitting any barrels or spinning the tires. **0** points given for excessive tire spinning. Completing this obstacle with hitting no barrels is worth **100** points

Obstacle #6 - Finish Line

The object of this obstacle is to navigate the truck through the cones to the finish line and get the left side plow **Blade** within 6" to 24" of the finish line. The operator must do this in a continuous motion and without sticking their head out the window. Should the driver or passenger stick their head out the window, **No Score** will be given. Stopping and then moving forward as well as changing direction will cost points. Sound your horn when ready to get measured. If you move after sounding your horn, there will be no score. Obstacle is worth **100** points.

This is a timed event and will be used for a tie breaker. Each obstacle not completed after the allotted time will not be scored.
